## What's New for Spring 2024?

Government

This section outlines any changes to the data, calculations or measures compared to the Fall 2023 release.

**Reminder**: The Required AEAMs - Overall Summary page has "N/A" placeholders for the "current result" for Provincial Achievement Tests (PATs) and Diploma Exam measures until results can be updated in the Fall. Please refer to the "Source Data Reference" page for further details.

#### **Data Updates**

- New year of results for all survey measures.
  - Introduction of two pilot survey questions as part of the Education Quality and Citizenship survey measures.
     Results for pilot questions are not included in the results for these survey measures while under review.
- New year of results for all derived measures (Diploma Exam Participation Rate, Drop Out Rate, High School Completion Rate, Post-Secondary Transition Rate and Rutherford Scholarship Eligibility Rate).

#### **Changes to PAT Results Reporting**

- Aggregate PAT results will now separate aggregate Grade 6 PAT results from aggregate Grade 9 PAT results to
  account for courses undergoing optional implementation/piloting of new curriculum.
- Footnotes should be reviewed to identify the courses included in each of the aggregate PAT results.
- New achievement evaluation references were calculated for the aggregate Grade 6 PAT and aggregate Grade 9 PAT measures to reflect the course(s) included for each measure.

#### Impact of May to June 2023 Wildfires

Participation in Diploma Exams was impacted by the fires in May to June 2023. Caution should be used when
interpreting trends over time for the province and those school authorities affected by this event.

#### Impact of recent events on 2019/20 to 2021/22 Diploma Exam Participation Rate results

- Participation in the Diploma Examinations was impacted by the COVID-19 pandemic from 2019/20 to 2021/22, including the cancellation of the January 2022 Diploma Exam administration.
- Consequently:
  - Results for the 2019/20 and 2020/21 school years are not available for the Diploma Exam Participation Rate.
  - School years 2019/20, 2020/21 and 2021/22 are not included in the rolling 3-year average. As a result, no
  - improvement evaluation is available for this measure in Spring 2024.
  - Caution should be used when interpreting trends over time.

Notes

1. Data values have been suppressed where the number of respondents/students is fewer than 6. Suppression is marked with an asterisk (\*).

2. Caution should be used when interpreting high school completion rate results over time, as participation in the 2019/20 to 2021/22 Diploma Exams was impacted by the COVID-19 pandemic. In the absence of Diploma Exams, achievement level of diploma courses were determined solely by school-awarded marks.

Aggregated Grade 6 Provincial Achievement Test (PAT) results are based upon a weighted average of percent meeting standards (Acceptable, Excellence). The weights are the number of students enrolled in each Grade 6 course. Courses included: Social 3.

#### **Achievement Evaluation**

Achievement evaluation is based upon a comparison of Current Year data to a set of standards which remain consistent over time. The Standards are calculated by taking the three-year average of baseline data for each measure across all school jurisdictions and calculating the 5th, 25th, 75th and 95th percentiles. Once calculated, these standards remain in place from year to year to allow for consistent planning and evaluation.

The table below shows the range of values defining the five achievement evaluation levels for each measure.

Measure	Very Low	Low	Intermediate	High	Very High
Citizenship	0.00 - 66.30	66.30 - 71.63	71.63 - 77.50	77.50 - 81.08	81.08 - 100.00

Notes:

1. For all measures: The range of values at each evaluation level is interpreted as greater than or equal to the lower value, and less than the higher value. For the Very High evaluation level, values range from greater than or equal to the lower value to 100%.

#### Improvement Table

For each jurisdiction, improvement evaluation consists of comparing the Current Year result for each measure with the previous three-year average. A chi-square statistical test is used to determine the significance of the improvement. This test takes into account the size of the jurisdiction in the calculation to make improvement evaluation fair across jurisdictions of different sizes. The table below shows the definition of the five improvement evaluation levels based upon the chi-square result.

Evaluation CategoryChi-Square RangeDeclined Significantly3.84 + (current < previous 3-year average)</td>Declined1.00 - 3.83 (current < previous 3-year average)</td>Maintainedless than 1.00Improved1.00 - 3.83 (current > previous 3-year average)Improved Significantly3.84 + (current > previous 3-year average)

#### **Overall Evaluation Table**

The overall evaluation combines the Achievement Evaluation and the Improvement Evaluation. The table below illustrates how the Achievement and Improvement evaluations are combined to get the overall evaluation.

#### **Measure Evaluation Reference - Achievement Evaluation**

#### School: 1991 Maplewood Canadian International School LLC

Achievement evaluation is based upon a comparison of Current Year data to a set of standards which remain consistent over time. The Standards are calculated by taking the three-year average of baseline data for each measure across all school jurisdictions and calculating the 5th, 25th, 75th and 95th percentiles. Once calculated, these standards remain in place from year to year to allow for consistent planning and evaluation.

The table below shows the range of values defining the five achievement evaluation levels for each measure.

#### Notes:

1. The range of values at each evaluation level is interpreted as greater than or equal to the lower value, and less than the higher value. For the Very High evaluation level, values range from greater than or equal to the lower value to 100%.

2. Achievement Evaluation is not calculated for courses that do not have sufficient data available, either due to too few jurisdictions offering the course or because of changes in tests.

Measure Evaluation Reference - Improvement and Overall Evaluation Table

School: 1991 Maplewood Canadian International School LLC

#### **Improvement Table**

For each jurisdiction, improvement evaluation consists of comparing the Current Year result for each measure with the previous three-year average. A chi-square statistical test is used to determine the significance of the improvement. This test takes into account the size of the jurisdiction in the calculation to make improvement evaluation fair across jurisdictions of different sizes.

The table below shows the definition of the five improvement evaluation levels based upon the chi-square result.

Evaluation Category	Chi-Square Range
Declined Significantly	3.84 + (current < previous 3-year average)
Declined	1.00 - 3.83 (current < previous 3-year average)
Maintained	less than 1.00
Improved	1.00 - 3.83 (current > previous 3-year average)
Improved Significantly	3.84 + (current > previous 3-year average)

#### **Overall Evaluation Table**

The overall evaluation combines the Achievement Evaluation and the Improvement Evaluation. The table below illustrates how the Achievement and Improvement evaluations are combined to get the overall evaluation.

			Achievement		
Improvement	Very High	High	Intermediate	Low	Very Low
Improved Significantly	Excellent	Good	Good	Good	Acceptable
Improved	Excellent	Good	Good	Acceptable	Issue
Maintained	Excellent	Good	Acceptable	Issue	Concern
Declined	Good	Acceptable	Issue	Issue	Concern

#### **Measure Evaluation Reference - Achievement Evaluation**

#### School: 1991 Maplewood Canadian International School LLC

Achievement evaluation is based upon a comparison of Current Year data to a set of standards which remain consistent over time. The Standards are calculated by taking the three-year average of baseline data for each measure across all school jurisdictions and calculating the 5th, 25th, 75th, and 95th percentiles. Once calculated, these standards remain in place from year to year to allow for consistent planning and evaluation.

The table below shows the range of values defining the five achievement evaluation levels for each measure.

Course	Measure	Very Low	Low	Intermediate	High	Very High
English Lang Arts 30-1	Acceptable Standard	0.00 - 81.51	81.51 - 85.05	85.05 - 90.15	90.15 - 94.10	94.10 - 100.00

Notes:

- 1. The range of values at each evaluation level is interpreted as greater than or equal to the lower value, and less than the higher value. For the Very High evaluation level, values range from greater than or equal to the lower value to 100%.
- 2. Achievement Evaluation is not calculated for courses that do not have sufficient data available, either due to too few jurisdictions offering the course or because of changes in examinations.

Measure Evaluation Reference - Improvement and Overall Evaluation Table

School: 1991 Maplewood Canadian International School LLC

#### Improvement Table

For each jurisdiction, improvement evaluation consists of comparing the Current Year result for each measure with the previous three-year average. A chi-square statistical test is used to determine the significance of the improvement. This test takes into account the size of the jurisdiction in the calculation to make improvement evaluation fair across jurisdictions of different sizes.

The table below shows the definition of the five improvement evaluation levels based upon the chi-square result.

Evaluation Category	Chi-Square Range		
Declined Significantly	3.84 + (current < previous 3-year average)		
Declined	1.00 - 3.83 (current < previous 3-year average)		
Maintained	less than 1.00		
Improved	1.00 - 3.83 (current > previous 3-year average)		
Improved Significantly	3.84 + (current > previous 3-year average)		

#### **Overall Evaluation Table**

The overall evaluation combines the Achievement Evaluation and the Improvement Evaluation. The table below illustrates how the Achievement and Improvement evaluations are combined to get the overall evaluation.

	Achievement						
Improvement	Very High	High	Intermediate	Low	Very Low		
Improved Significantly	Excellent	Good	Good	Good	Acceptable		
Improved	Excellent	Good	Good	Acceptable	Issue		
Maintained	Excellent	Good	Acceptable	Issue	Concern		
Declined	Good	Acceptable	Issue	Issue	Concern		
Declined Significantly	Acceptable	Issue	Issue	Concern	Concern

#### **Achievement Evaluation**

Achievement evaluation is based upon a comparison of Current Year data to a set of standards which remain consistent over time. The Standards are calculated by taking the three-year average of baseline data for each measure across all school jurisdictions and calculating the 5th, 25th, 75th and 95th percentiles. Once calculated, these standards remain in place from year to year to allow for consistent planning and evaluation.

The table below shows the range of values defining the five achievement evaluation levels for each measure.

#### Notes:

- 1. For all measures except Drop Out Rate: The range of values at each evaluation level is interpreted as greater than or equal to the lower value, and less than the higher value. For the Very High evaluation level, values range from greater than or equal to the lower value to 100%.
- 2. Drop Out Rate measure: As "Drop Out Rate" is inverse to most measures (i.e. lower values are "better"), the range of values at each evaluation level is interpreted as greater than the lower value and less than or equal to the higher value. For the Very High evaluation level, values range from 0% to less than or equal to the higher value.

#### **Improvement Table**

For each jurisdiction, improvement evaluation consists of comparing the Current Year result for each measure with the previous three-year average. A chi-square statistical test is used to determine the significance of the improvement. This test takes into account the size of the jurisdiction in the calculation to make improvement evaluation fair across jurisdictions of different sizes. The table below shows the definition of the five improvement evaluation levels based upon the chi-square result.

Evaluation Category	Chi-Square Range
Declined Significantly	3.84 + (current < previous 3-year average)
Declined	1.00 - 3.83 (current < previous 3-year average)
Maintained	less than 1.00
Improved	1.00 - 3.83 (current > previous 3-year average)
Improved Significantly	3.84 + (current > previous 3-year average)

#### **Overall Evaluation Table**

The overall evaluation combines the Achievement Evaluation and the Improvement Evaluation. The table below illustrates how the Achievement and Improvement evaluations are combined to get the overall evaluation.

			Achievement		
Improvement	Very High	High	Intermediate	Low	Very Low
Improved Significantly	Excellent	Good	Good	Good	Acceptable
Improved	Excellent	Good	Good	Acceptable	Issue
Maintained	Excellent	Good	Acceptable	Issue	Concern
Declined	Good	Acceptable	Issue	Issue	Concern

Notes:

1. Data values have been suppressed where the number of respondents/students is fewer than 6. Suppression is marked with an asterisk (\*).

2. The AEA survey was introduced as a pilot in 2020/21, when participation was also impacted by the COVID-19 pandemic. Caution should be used when interpreting trends over time.

3. A "N/A" response was added to the AEA survey in 2020/21, allowing respondents to clearly indicate when a question was not applicable. Unlike "Don't Know", a response of "N/A" does not count towards the total number of responses in the survey result. Caution should be used when interpreting trends over time.

### **Appendix – Definitions for Measures and Key Terms**

The **First Nations**, **Métis and Inuit** results reported for the Alberta Education Assurance Measures only include students that self-identified as First Nations, Métis or Inuit on student registration forms. School authorities are required to report on Alberta Education Assurance Measure results for First Nations, Métis, and Inuit students in their 3-year education plans and annual education results reports for the purpose of monitoring and improving education outcomes. Please ensure context and appropriate analysis are provided whenever results for self-identified First Nations, Métis and Inuit students are shared publicly.

**High School Completion Rate** is the percentage of students in the Grade 10 Cohort<sup>1</sup> who have completed high school by the end of their third year, adjusted for attrition<sup>2</sup>.

 High school completion is defined as: receiving an Alberta high school diploma, certificate of high school achievement (completion of Knowledge and Employability courses and the certificate requirements) or high school equivalency (GED); entering a post-secondary level program at an Alberta post-secondary institution; registering in an Alberta apprenticeship program; or earning credit in a minimum of five grade 12 courses, including a Language Arts diploma exam course and three other diploma examination courses.

#### Interpretation of High School Completion Results

- High School Completion Rate (3-year, 4-year or 5-year) results for the same Grade 10 Cohort can be read by moving *diagonally* from the reporting year, to the next in the table. For example:
  - The 3-year high school completion rate for the Grade 10 cohort that started in 2016 is reported in 2018 as 79.7%.
  - The 4-year high school completion rate for the <u>same cohort</u> is reported in 2019 as 84.0%.
  - The 5-year high school completion rate for the <u>same cohort</u> is reported in 2020 as 86.2%.

	Alberta											
	2016		2017		2018		2019		2020			
	Ν	%	N	%	N	%	Ν	%	N	%		
3 Year Completion					44,978	79.7						
4 Year Completion							44,980	<mark>84.0</mark>				
5 Year Completion									44,972	86.2		

**Post-Secondary Transition Rate (6-year)** is the percentage of students in the Grade 10 Cohort who have entered a post-secondary-level program at an Alberta post-secondary institution or registered in an Alberta apprenticeship program within six years of entering grade 10, adjusted for attrition.

• An estimate of out-of-province post-secondary enrollment is applied based on the numbers of funded Alberta students attending post-secondary institutions out of province.

**Diploma Exam Participation Rate (4+Exams)** is the percentage of students in the Grade 10 Cohort who have written four or more diploma exams by the end of their third year in high school, adjusted for attrition.

• Students are not considered a diploma examination participant if they do not have an examination mark.

**Drop Out Rate** is the percentage of students aged 14 to 18 years registered in the Alberta Kindergarten to Grade 12 system who drop out the following year, adjusted for attrition.

- An initial age specific cohort of students aged 14 to 18 years is established for a given school year, excluding the following groups of students: students who are not registered on September 30th of the school year; students registered in schools not affiliated with Alberta (e.g. Lloydminster); students registered in schools under provincial or federal authorities; students identified as having a moderate/severe cognitive or severe multiple disability; visiting/exchange students; students attending Hutterite colony schools.
- · A student who was in Alberta's education system is considered to have dropped out if:
  - There is no evidence of their participation in the Alberta education system the following school year (including in Alberta post-secondary and apprenticeship programs)

### **Appendix – Definitions for Measures and Key Terms**

• They did not complete high school (see high school completion measure for details).

**Rutherford Scholarship Eligibility Rate** is the percentage of Alberta grade 12 students who have met the eligibility criteria for a Rutherford Scholarship based on course marks in grades 10, 11 and/or 12.

 Students must have completed at least one grade 12 course. Students in the following categories are excluded: students who are not registered on September 30th of the school year; students registered in schools not affiliated with Alberta (e.g. Lloydminster); students registered in schools under provincial or federal authorities; students identified in the grade 12 school year as having a moderate/severe cognitive disability or severe multiple disability; students identified in the grade 12 school year as visiting/exchange students; students 20 years of age or older on September 1 of the school year.

**Provincial Achievement Test (PAT) Results (Acceptable / Excellence)** are based on all students in each grade (total enrollment in the grade plus the ungraded students who are in the corresponding year of schooling). Results are calculated for each test. The overall result is the average of the results for each test weighted by the number of students enrolled.

- PAT acceptable is the percentage of students who achieve the acceptable standard on grades 6 and 9 Provincial Achievement Tests.
- PAT excellence is the percentage of students who achieve the standard of excellence on grades 6 and 9 Provincial Achievement Tests.

**Diploma Exam Results (Acceptable / Excellence)** are based on the numbers of students writing each diploma exam. The overall diploma exam result is the average of the results for each exam weighted by the number of students writing.

- Diploma exam result (acceptable) is the percentage of students who achieve acceptable standard (i.e. a mark of 50%) on a diploma exam.
- Diploma exam result (excellence) is the percentage of students who achieve the standard of excellence (i.e. a mark of 80%) on a diploma exam.

#### **Survey Measures**

In public, separate and Francophone schools all students in grades 4, 7 and 10; their parents; and all teachers are included in the survey. In charter schools and level 2 private schools students in grade 4 and above; their parents; and all teachers are included in the survey.

- The measure results for parents and teachers are calculated by aggregating the responses to all questions that comprise the measure.
- The measure result for students is calculated by first aggregating the responses to questions within each grade grouping and then taking a simple average across grade groups.
- The overall measure result is calculated by taking the simple average of measure results for parents, teachers and students.

#### Table Headings

For each table displaying measure history or 3-year Rolling Averages, **N** represents the size of the underlying cohort. For example:

- N is the size of the Grade 10 Cohort for High School Completion Rate, Post-Secondary Transition Rate, and Diploma Exam Participation Rate.
- **N** is the size of the age-specific cohort for Drop Out Rate.
- For survey measures, **N** is the number of respondents.

Values under the % column headings represent the rate for that cohort.

Some measures are calculated using several years of data. In these cases, the years displayed in the tables and charts reflect the latest years of data included in each calculation.

# **Appendix – Definitions for Measures and Key Terms**

<sup>1</sup><u>Grade 10 Cohort:</u> Students are included in the Grade 10 Cohort in the first school year in which they have a grade 10 registration at a public, separate, Francophone, charter or accredited private school. The following categories of students are excluded from the Grade 10 Cohort:

- e. students who are identified as having a moderate/severe cognitive disability or a severe multiple disability;
- f. students attending Hutterite Colony schools; and
- g. visiting or exchange students

<sup>2</sup><u>Attrition</u>: The loss of students due to out-migration and mortality, referred to as "attrition", is estimated from department and Statistics Canada data.

a. students who register after September 30th of the school year;

b. students who are registered in schools under provincial and federal authorities, Lloydminster

school authorities or other out-of-province schools;

c. students who have a concurrent grade 9 registration in the same school year;

d. adult students (older than 18 when they start grade 10);

#### **Achievement Evaluation**

Achievement evaluation is based upon a comparison of Current Year data to a set of standards which remain consistent over time. The Standards are calculated by taking the three-year average of baseline data for each measure across all school jurisdictions and calculating the 5th, 25th, 75th and 95th percentiles. Once calculated, these standards remain in place from year to year to allow for consistent planning and evaluation.

The table below shows the range of values defining the five achievement evaluation levels for each measure.
